

Seven good reasons for choosing this winner

“ Perhaps not everyone knows there are seven good reasons why you should choose the new **T-basic** by Rigo®, this turbine is the protagonist of the year 2018. It embodies all the winning professional features of all the equipment manufactured by this Lombard company, thanks to which Rigo® has become a major market player. Let's look at these features together!

T-basic is the new turbine that was unveiled by Rigo® early this year, as a valuable addition to the range of products already available, and as a response to approaches that look to a more hobby-oriented target: people who, nevertheless, insist on quality and optimal performance ratings in the equipment they use.

Why did Rigo ha decide to market this turbine version? We realised that people had not become accustomed to using HVLP spray painting systems, and thought professional painters might then look into the products applied using this technique. So we decided to create something basic (Basic), a sort of concentration of the strengths and the instruments that are necessary if we are to help professionals who are already capable veterans when it comes to roller and/or brush work, and who are interested in progressing toward new application techniques and an appreciation of the openings these techniques provide, not to mention their many, many advantages.

Reliability- Turbine HVLP T-basic 500W is an item that combines the professional characteristics of Rigo® products with all the qualities of user-friendliness, reliability and hand-on practicality that hobbyists seek. T-basic quality is 100% Made in Italy.

Impressive range of uses -

T-basic can be used with all widely used paint products. It's an ideal solution for any number of sectors (construction, boatyards, carpentry, automotive and steelwork).

User-friendly-

T-basic weighs 4.8 Kg. This means it's very easy to move it around the place during use. Its sturdy motor features a two-stage bypass. This item also features a shoulder strap and a soft 1.5.m Flex connection. It can be used with the entire range of Rigo® accessories,

The real deal!- T-basic includes a decidedly favourable quality-price relation. It makes for savings of materials with no sacrifices in terms of results! It is also suitable for rental or for use on the part of non-expert operators.

Guarantee- T-basic is backed up by the 75 years of activities of Rigo® in the sector of spray applicatins. What more could you ask for? ■

RIGO® HVLP SYSTEMS AND THEIR BENEFITS

The following are just a few of the major benefits that come when you use Rigo HVLP spray systems

We may note just how user-friendly and functional this resource is. Alongside efficiency and flexibility we must also remember its safeguards – both environmental and for the health of users (without detracting from economic considerations and the need to curb costs).

also for major, demanding workloads.

Precision- T-basic enables absolute precision also when applying fine products (with a transfer rating of up to 95%).

Performance- T-basic saves massive amounts of time compared to roller use. It simplifies application in many complex situations. It may therefore be considered a tool of excellence – also from the economic angle. T-basic is user-friendly. Just add the paint to the tank! It's reliable. There's nothing that'll break and nothing to be adjusted that you might then adjust wrongly! It also comes with a metal airbrush and a translucent upper tank, so you can always see how much of the spray product is there during use.

Rigo® HVLP at the service of operators

- Limited overspray, low quantities of suspended material; loss of material is limited
- Higher levels of delivery of the material to surfaces for the more demanding tasks
- Savings in the quantities of paint used, for improved undercoats and no excess paintwork
- A timesaver at the preparation stage and during cleaning
- The spray air is oil-free and condensation-free, for neatly precise results
- The air volume can be adjusted to the ideal setting for the task at hand
- Perfect air volume/pressure ratio at all times
- Reduction in maintenance
- Full assortment of accessories

Rigo® HVLP's clear economic benefits

- Transfer rate for the material (up to 95%)
- Waste reduction
- 60% time saving compared to brush and roller work
- Reduction in maintenance
