

The most performing solution for the paint spraying

Developed on the basis of the well known TLY1K Trolley and the TPC01N "Backpack with Tank", the new TSV trolley is equipped at best to allow a comfortable and efficient painting job with a considerable working range, beside being ideally suited for all indoor and outdoor uses within the prevalence limits typical of the HVLP spraying systems.

TSV: INSTRUCTIONS for use

The TSV Trolley is equipped with a Flex type air hose, 3 m long for the greatest flexibility, with a powerful and versatile TMR90E - 900W turbine electronically adjustable with the supplied remote control, with a 6 liters paint tank, a peculiar aerograph, developed on purpose for the use of special enamels and coatings, solvent proof product hose and many other useful accessories.

A truly complete and versatile piece of equipment that, as for all the other Rigo Products, is equipped with spare parts and several accessories, fully compatible and usable with all the RIGO HVLP painting systems.

"We prefer to consider our suppliers and customers like partners -affirms Riccardo Rigolio, CEO of Rigo- not just entities to undertake the commercial relations with. Exactly this

“ Rigo presents the innovative **Painting Station TSV** to all professional operators, the ultimate technology frontier for spraying independently.

kind of relationship allows us to gather various ideas to enlarge our product range or to perfect more performing solutions.

On this concept basis, we have decided to propose, among the 2014 novelties, the mobile Painting Station TSV, an evolution of trolley which carries turbine and accessories in order to make the operator more independent during his own work."

Rigo, since 70 years synonymous for "PERFECT SPRAYING"

Leading company in its market niche, Rigo is specialized in manufacturing of HVLP spray painting equipment and accessories to satisfy all the applications of enamels, wall water paintings and various coatings for buildings, boats, car body, car-
